

Stakeholder Meeting #2, May 16, 2017

Public Polling Results

Topic 1: Local Floodplains

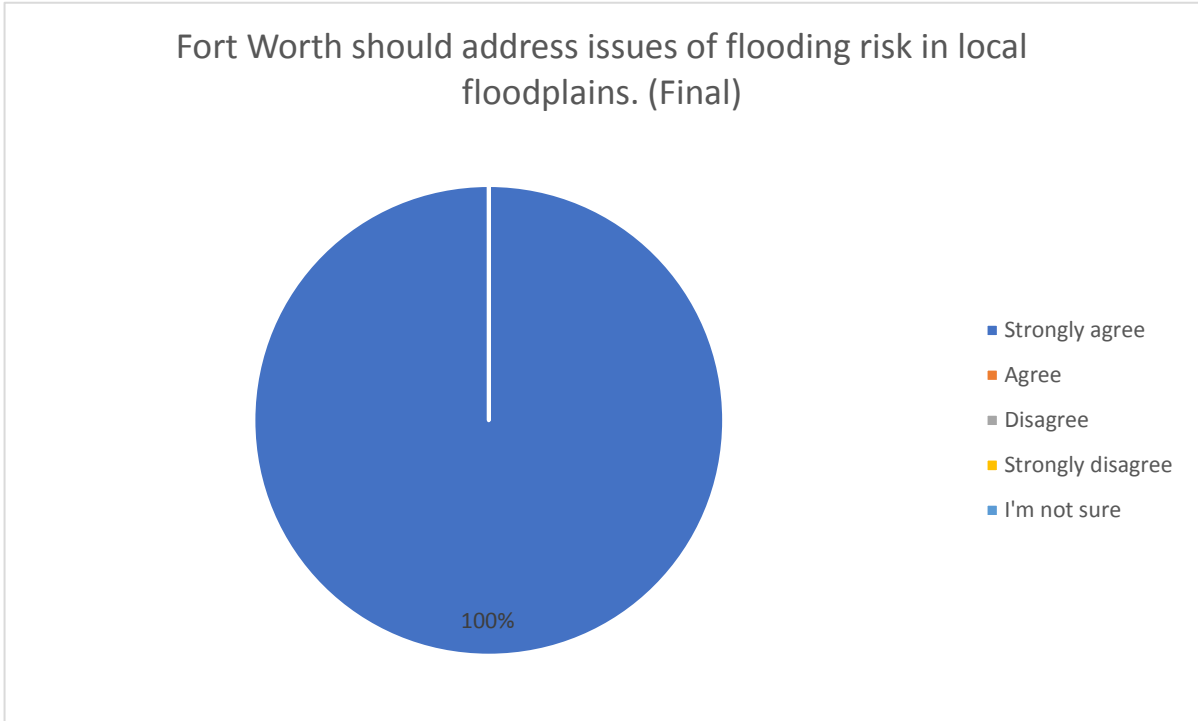

How important are these strategies for addressing local floodplains?

	Very important	Somewhat important	Somewhat unimportant	Very unimportant	I'm not sure
Having the City provide the local floodplain maps to the public.	100.0%	0.0%	0.0%	0.0%	0.0%
Reviewing all development in local floodplains, even those smaller than 1 acre.	80.0%	20.0%	0.0%	0.0%	0.0%
Considering these floodplains in evaluating requests for rezoning, subdivision, special use permits & other development approvals.	80.0%	20.0%	0.0%	0.0%	0.0%
Reflecting these flood risks in City plans and policies, such as the Comprehensive Plan.	100.0%	0.0%	0.0%	0.0%	0.0%
Requiring that any substantial rehabilitation, renovation or new development (including after a flood) maintain finished floor elevations above the 100-year flood elevation.	60.0%	40.0%	0.0%	0.0%	0.0%
Considering the impact a local floodplain approach would have on property values.	60.0%	40.0%	0.0%	0.0%	0.0%

Topic 2: Private Property Channel Erosion Policy

How important is each of these issues to a private property channel erosion policy?

	Very important	Somewhat important	Somewhat unimportant	Very unimportant	I'm not sure
Natural stream buffers should be created so future development has less risk from erosion.	60.0%	20.0%	20.0%	0.0%	0.0%
City capital investment should be considered only when there is a public benefit.	75.0%	25.0%	0.0%	0.0%	0.0%
Even though the City capital investment has provided erosion protection on private property, the City should be responsible for maintenance.	20.0%	60.0%	20.0%	0.0%	0.0%
City capital investment should depend on the amount of private cost-sharing match.	25.0%	50.0%	25.0%	0.0%	0.0%

Public Polling Results

Topic 3: Voluntary Buyout Program

In setting priorities for a voluntary buyout program, how important is each of these issues?

	Very important	Somewhat important	Somewhat unimportant	Very unimportant	I'm not sure
Cost-benefit ratio of buyout vs. stormwater capital project.	100.0%	0.0%	0.0%	0.0%	0.0%
Frequency of the property's past flooding.	100.0%	0.0%	0.0%	0.0%	0.0%
The buyout qualifies for grant funding.	25.0%	50.0%	25.0%	0.0%	0.0%
Potential to use the property as a neighborhood amenity or an addition to the City's open space network.	50.0%	25.0%	25.0%	0.0%	0.0%
Impact on neighborhood fabric and integrity.	75.0%	25.0%	0.0%	0.0%	0.0%
Adjacency to public property (i.e., parks, greenbelts).	25.0%	75.0%	0.0%	0.0%	0.0%
Level of threat to structure due to channel erosion.	25.0%	75.0%	0.0%	0.0%	0.0%

Public Polling Results

Topic 3: Voluntary Buyout Program, continued

Which factor is most important in setting priorities for voluntary buyouts?	
Cost-benefit ratio	25.0%
Past flooding frequency	50.0%
Neighborhood fabric & integrity	25.0%
Value as an amenity	0.0%
Qualification for grant funding	0.0%
Adjacency to public property	0.0%
Channel erosion threat to structure	0.0%

Topic 4: Development Oversight

Fort Worth's stormwater management oversight during the development review process should provide a more thorough evaluation of stormwater impact than currently done. (Initial)

How important are these development review issues?

	Very important	Somewhat important	Somewhat unimportant	Very unimportant	I'm not sure
The City should have more protective standards in areas with known flooding problems.	80.0%	20.0%	0.0%	0.0%	0.0%
Providing an incentive or bonus to development that contributes to reducing existing flooding in identified floodprone areas	50.0%	25.0%	0.0%	25.0%	0.0%
The City should establish a stormwater review threshold of less than 1 acre in size.	40.0%	60.0%	0.0%	0.0%	0.0%
The cumulative stormwater impacts of future development in a watershed should be considered when reviewing development proposals.	75.0%	25.0%	0.0%	0.0%	0.0%
The City should review stormwater issues thoroughly even if this takes longer for complex projects.	80.0%	0.0%	20.0%	0.0%	0.0%
