

City of Fort Worth Registration Policies for Community Organizations

The City of Fort Worth has policies for community organizations that desire to be registered with the City. These policies set forth minimum requirements to maintain registered status, thereby providing more effective communication between neighborhoods and the City and ensuring an open, inclusive and democratic process. By institution of these policies the City encourages residents to work within existing registered associations and use the democratic process to do so to achieve neighborhood and community revitalization goals.

The City of Fort Worth Community Engagement Office assists residents as they organize associations, provides support to existing associations, facilitates communication between residents and City departments, provides useful information to neighborhoods, and develops educational opportunities for associations to continue to grow and be successful. Questions concerning these policies should be directed to the Community Engagement Office.

Benefits of Registration

Inclusion in the Community Engagement Database—The Community Engagement Database provides contact information pertaining to each organization registered with the City. The database is widely used by all City departments for public outreach. It is the key communication tool to keep organizations informed.

Inclusion in the weekly distribution of the Community Engagement Weekly Bulletin and other special email notifications sent by the city - These tools help to keep residents informed on issues that could impact their neighborhood.

Inclusion in the Neighborhood Organization Map—This map documents the official boundaries for each neighborhood and is used by the City for many purposes.

Registration in the Early Courtesy Notification System—The Early Courtesy Notification System provides early notification of Board of Adjustment, Planning Commission and Zoning Commission cases that fall within a Registered Association's boundaries or a ¼ mile of the association's boundaries. The notification is in addition to City notification of adjoining property owners within 300 feet. Voluntary and Mandatory Neighborhood Associations, Neighborhood Alliances, Neighborhood Redevelopment Organizations and Business Associations are eligible for this benefit.

Support and Training—The Community Engagement Office provides free training opportunities for

registered organizations as well as technical assistance on organizational issues and City service issues.

**Facilitated Resolution Services - Facilitation is a process by which a mutually agreed-upon neutral third party helps to coordinate the activities of a group, acts as a process facilitator during meetings, or helps a group prevent or manage tension and move productively toward decisions. The facilitation role can be placed on a continuum from simple group coordination and meeting management to intensive multi-party dispute mediation.*

A facilitator is a neutral party who moderates discussions, monitors speaking time, records key discussion points, periodically summarizes the discussion, and provides constructive feedback. Facilitators help create an atmosphere of trust and fairness by ensuring that all groups have equal say in the discussion and that everyone understands each other. In contentious situations, the facilitator maintains civility and keeps the discussion focused.
