

Fort Worth Central City Water and Sewer Main Relocations community construction meeting

Monday June 5, 2023

6 p.m.

Tarrant Regional Water District, 800 E. Northside Drive, Fort Worth

Agenda

- Introductions
- Project Overview
- Project Area
- Frequently Asked Questions
- Timeline

Your project team includes:

Project Manager: Liam Conlon

- 817-392-6824; Liam.Conlon@FortWorthTexas.gov

Inspector: Shane Behn

- 682-328-1264; Shane.Behn@fortworthtexas.gov

Your project team includes:

Contractor: Circle C Construction

- Keegan Jonkers

Engineering Design Consultant: Kimley-Horn

- Carl DeZee

What drives this improvement project?

Existing water and sanitary sewer mains will be relocated to accommodate the proposed United States Army Corps of Engineers Bypass Channel Segment.

The relocations impact:

- NE 11th Street
- North Main Street
- North Houston Street
- And two easements

What is the Central City Bypass Channel?

The purpose of the Panther Island Central City Flood Project is to provide Fort Worth with needed flood protection. The central City project is limited to infrastructure needed for flood protection.

As stated previously, water and sewer relocations are needed for this north bypass that is approximately 3,900 feet of the overall 8,400 feet of the bypass channel.

The flood protection project is being constructed by the United States Army Corps of Engineers in partnership with the Tarrant Regional Water District, the City of Fort Worth, and Tarrant County.

What are the boundaries of the City's project?

This City relocation project is bound by:

- NE 11th Street to the north
- North Calhoun Street to the east
- West Fork of the Trinity River to the south
- And, North Houston Street to the west.

What part of Fort Worth does this impact?

This project is in Fort Worth Council District 2. Construction will impact the Inter-District 2 Alliance.

The construction also borders the North Side neighborhood association.

What is included in the City's project scope?

- North Houston Street from the Grand Avenue/North Houston Street intersection to 1,760 feet to south (water and sewer)
- North Main Street from the intersection of NE 11th Street and North Main Street to 500 feet south (water and sewer)

Will our water be turned off?

Water will be turned off for 15-30 minutes when service is transferred from the existing line to a temporary water line, and when the service is transferred from the temporary to the new line. These switchovers are done during the day.

The contractor will knock on the door and let customers know when the water will be turned off. The transfer typically takes 30 minutes per house or business.

How does the temporary line impact my home & water bill?

The temporary water line insures that you are not without water during construction. In the summer months the continuous flow keeps the water from becoming stagnant in the above-ground line.

During the winter months, water must be continually flowing through the temporary line to keep the line from freezing. Customers should also keep their faucets dripping.

The bill for your water usage while you are on the temporary line is based on an average of the previous months' usage.

Will you need access to our property?

Construction will be in the streets and easements. If Fort Worth Water needs access to your property we will contact you. If an easement is needed for your property a city land agent will be contacting you soon.

Will sewer service be disrupted?

Sanitary sewer service will not be interrupted. New sewer cleanouts will be installed at the property line. The sewer cleanout provides crews easy access if a backup or blockage occurs.

Will I have access to my driveway during construction?

The inspector and the contractor will work with businesses and residences who need driveway access during active construction hours.

How are you going to coordinate traffic during construction?

We will have a traffic control plan in place before the contractor starts work.

Will the city's trash truck be able to pick up my trash and recycling during construction?

If your side of the street is closed on your scheduled trash collection day, the contractor will take your trash and recycling carts to the opposite side of the street so the trash collection vehicle can pick it up.

Will there be lane closures during construction?

Yes.

Signs will be posted to alert motorists.

What are the construction hours?

The hours of construction are 7 am to 6 pm, Monday-Friday . . .

And, if requested by the contractor, 9 am to 4 pm or 5 pm - on Saturdays.

Timeline

Construction activities are scheduled to start on June 20, 2023.

The starting point is the southern end of North Houston Street (the dead end), just north of the West Fork of the Trinity River.

The current schedule shows construction will be wrapped up by late Fall or early Winter of 2024.

Where can I get more information?

- Go to www.FortWorthTexas.gov and type in the project number – 969 - in the search bar on the home page. Fort Worth Central City Water and Sewer Main Relocations will pop up.
- To get project page updates, scroll down to the bottom of the project page and click on “Subscribe to this page.”
- The link to a PDF of this PowerPoint and a link to the YouTube video of this presentation will be posted to this project page.

How do I report an emergency or non-emergency?

Emergencies

Water main breaks, sewer backups - 24 hours a day

817-392-4477, Select Option 1

Water Call Center (non-emergency)

- 7 am to 7 pm Monday through Friday
- 817-392-4477
- Closed City holidays

Download the MyFW app from the App Store or Google Play. You can report sewer overflows, leaks and water main breaks, missing or broken meter lids, water theft, water violations, no water service, water pressure issues and other sewer concerns.
