ARCHITECTURAL DESIGN AND PROGRAMMING SUMMARY

- There is a palpable sense that the city does not do enough in the neighborhood, in terms of providing safe environment. Not enough sidewalks, lighting on the streets, and enforcement of city ordinances.
- Several people thought that just fixing the current light poles that are not working would improve the neighborhood.
- Emphasis on local business and not fast-food chains.
- Music came up several times with several people.
- Making the area walkable and providing places for children and pets to play. This was particularly important for some of the young families that attended, but also the older, empty nesters who are pet owners.
- There is an overall call for maintaining or recalling the cultural identity and history of the neighborhood. There's a feeling that new buildings should be 'unique' and to avoid looking like other parts of the city.
- Housing should be affordable.
- There is a fear that benches and some of the referenced images may result in more homeless people hanging out in the neighborhood.
