

## RE-THINKING WASTE A GREENER FORT WORTH

# CREATING SUSTAINABLE PRACTICES FOR A HEALTHY ENVIRONMENT

Fort Worth is a vibrant community where residents participate in a number of green initiatives. The latest initiative, 'Re-thinking Waste – A Greener Fort Worth,' is one of the largest green initiatives yet.

- We are developing a comprehensive solid waste management plan that will guide the city 20 years into the future.
- We hope to capture the best and most appropriate innovations and technology for our waste management.
- Please join us in an interactive community-wide effort to and make a greener Fort Worth.

### Current Diversion Rate

### Goal Diversion Rate

We need to reach beyond 40% as we plan for the next 20 years.

### Then and Now

A good plan considers the past and the present to determine a greener future.

Our business and industry generates two-thirds of our waste.

### Increase Diversions

The City of Fort Worth is committed to responsible management of all solid waste. One of our goals is to increase the amount of solid waste that we keep out of the landfill. We've made progress, but more can be done. Help us plan a future that considers growth, innovation and technology so we can reach our goal.

### Your Voice is Important

Responsible management of solid waste by all of us will help protect quality of life and create a healthy environment all residents can enjoy now and into the future. We want to know what you think. Call, email, or connect with us online using the information below.
