

# Want to go green with us?

EVERYTHING YOU NEED TO KNOW ABOUT VOLUNTEERING FOR THIS PROJECT

## SUMMARY

A graffiti-going green project is designed for individuals and groups who would like to volunteer with us. Volunteers will plant ivy against a heavily tagged wall within a park or similar location in Fort Worth. By planting the ivy, the goal is for ivy to grow up the wall, and deter from graffiti being tagged or visible in the area.

### Purpose

**To help reduce and discourage criminal defacement of private and public property and make Fort Worth an even more beautiful community. With this eco-friendly method, we can use our volunteer program resources to create viable and effective natural graffiti barriers.**

### Duties

**In this very visible role, you'll attack graffiti by planting ivy to grow up a heavily tagged wall. On the day of your project, you will prep the area and plant the starter ivy to grow up the wall. You might also be planting additional plants or flowers to beautify the area.**

### Location

**Before your project, you will be sent the location via email. Some projects are only at one location, depending on the size of the area, but others could be at several different locations, transportation is required for this project.**

### Time Frame

**Typically a 1 to 2-hour shift.**

### Requirements

- **If you are under the age of 16 you must be accompanied by an adult.**
- **Must have transportation in case we visit several sites throughout the day.**
- **May be required to carry heavy materials such as shovels and dirt.**
- **Must wear closed-toed shoes and clothing for gardening.**
- **Are okay with outdoor activities. Projects are planned with good weather months in mind, but it may be cold or hot on the day of your project.**
