

Community Meeting for  
Sidewalk Improvements for  
Pinson Street  
From Village Creek Road to Carverly Avenue  
Council District: 5  
CPN: 104760

**Project Manager: Shweta Rao**  
Project Engineers: Freese and Nichols, Inc.

October 27, 2023

## *Agenda*

- Project Background and Location Map
- Project Schedule
- Frequently Asked Questions
- Project Contact Information

## ***Project Background***

Objectives include:

- Improve pedestrian mobility, connectivity, and safety by constructing sidewalks, and ADA compliant pedestrian curb ramps on the south side of Pinson Street between Village Creek Road and Carverly Avenue.
- Project improvements will provide safe access too surrounding schools, JPS Health Center, and public transit stops.
- Project funded by 2022 Bond Program funds

# Project Location Map

**Project Location**

Carverly Avenue

Pinson Street

Village Creek Road

Village Creek Road

Stalcup Road

Carverly Avenue

**Project Location**

Pinson Street

JPS Clinic

Sunrise McMillan Elementary School

Approximately 5,100 Feet of Sidewalk Improvements on South Side of Pinson Street

## ***Project Schedule***

- Currently in design phase
- Estimated construction start – Summer 2025
- Estimated construction duration – 6 months
- Estimated construction cost - \$1.7M

## *Frequently Asked Questions*

**Q: What is the typical width of the proposed sidewalk?**

**A: The typical width of the sidewalk will be 5' when detached from the roadway curb and 6' when attached to the roadway curb. Where existing trees are located, the width of the sidewalk maybe reduced to 4' to preserve the tree and reduce impacts to the base or roots of the tree.**

**Q: Are we impacting driveways in the project? If so, will there be any access to the property during driveway construction?**

**A: There will be multiple driveway reconstructions with this project. We will be replacing one panel at a time and will provide continuous access to the property at all times.**

## *Frequently Asked Questions*

**Q: Will existing tree removals be necessary?**

***A: No trees are planned to be removed.***

**Q: Will traffic lanes be temporarily closed or detoured?**

***A: We do not anticipate any street closures or detoured streets associated with this project.***

## ***Frequently Asked Questions***

**Q: Will existing irrigation systems or grass be impacted with this project?**

**A: If an existing irrigation system or grass parkway is impacted by the construction, the contractor will be required to repair the site to pre-construction conditions. If an irrigation system is within the limits of the proposed improvements, the system will be adjusted by the contractor.**

**Q: Will the construction materials and equipment be left on-site during construction?**

**A: Yes, the contractor will keep materials and equipment on-site during construction. However, the travel lanes will be re-opened when the contractor is not on-site. In addition, the contractor will clean the work site every day prior to leaving for the day.**

## ***Project Contact Information***

**City of Fort Worth Project Manager:**

**Shweta Rao, PE, PMP**

**Professional Engineer, Transportation Public Works**

**817-392-8022**
