Appendix A-1
Fort Worth ADA Transition Plan

City of Fort Worth, Texas

Mayor and Council Communication

DATE	07/21/92	REFERENCE NUMBER	G-9743	LOG NAME	14ADA	PAGE	1 of 1
SUBJECT	CITY OF FORT WORTH ADA TRANSITION PLAN						

RECOMMENDATION:

It is recommended that the City Council approve the attached ADA Transition Plan. The Plan was presented to City Council on July 7, 1992 in Informal Report #7626.

DISCUSSION:

The Americans with Disabilities Act (ADA) requires the development of a Transition Plan to make public buildings and facilities accessible to individuals with disabilities. The Plan has been developed and must be adopted by the City Council by July 26, 1992.

Implementation of the plan is to take place over a three-year period. One million dollars is estimated to be required for the first year's expenses associated with implementation of the City's plan. Almost half of the \$1,000,000.00 is required for curb cuts and ramps for entrance to governmental facilities. Improvements will be made at approximately 245 facility locations in the first year. One hundred and forty-five of the locations will require provisions for handicapped parking areas and appropriate signage. Corrections are also required in restrooms, elevators and special use areas.

CITY OF FORT WORTH TRANSITION PLAN JULY 13, 1992

Summary. This plan was formulated in accordance with the Americans with Disabilities Act (ADA) of 1990 requirement that local governments develop a Transition Plan by July 26, 1992. The Transition Plan outlines the structural changes to facilities required to make programs accessible to persons with disabilities including mobility, visual, hearing, and mental impairments. This Informal Report provides the City Council with staff's recommended plan for action and a suggested time frame to adopt the City's Transition Plan.

The Transition Plan focuses on alterations to facilities. It identifies physical obstacles; describes in detail methods to make facilities accessible; specifies a schedule for making the necessary alterations; indicates the official responsible for implementing the plan. All structural changes should be accomplished as soon as possible, but no longer than three (3) years. As it will take longer than one year to make the facilities accessible, the City is required to develop an annual plan for each of the three years, identifying which alterations will be made in each plan year.

The Transition Plan also includes a schedule for the provision of curb ramps or other sloped areas where pedestrian walks cross curbs.

Additionally, there must be an opportunity for interested citizens, including persons with disabilities and organizations which represent them, to comment on the transition plan.

Finally, the Transition Plan must be retained and made available for public inspection for three years.

Process Used to Produce Transition Plan. The Transition Plan was developed after surveying over 700 City facilities. City facilities were first prioritized into "A", "B", and "C" categories: "A" facilities are those with a large volume of public traffic, e.g. City Hall, Recreation Centers, Multipurpose Centers, Public Safety Building, Police Department, etc.; "B" facilities are primarily worksites with little public traffic, e.g. service centers, water plants, storage warehouse, etc.; "C" facilities are remote facilities, occasionally visited by staff, e.g. paint sheds, some storage areas, records holding areas, etc.

All "A" and "B" priority facilities were inspected in March and April by nine teams assembled from a pool of 24 City employees loaned by several departments. The teams were trained on facility

accessibility concepts and how to survey a facility by Scott Haynes, R.E.A.C.H. Independent Living Center, who developed the facility accessibility survey instrument and who is a board member of the Mayor's Committee on Employment of Persons with Disabilities. The Access Sub-Committee of the Mayor's Committee, chaired by R. A. Wade, also assisted in the training and accompanied the City survey teams to important or representative structures.

Each survey team was provided a kit which included a camera, angle finder, fish scale, and a 12' tape measure. The 67-point check list (Attachment A) required comments and measurements on everything from slopes of curbs, ramps, parking spaces, number of pounds of pressure to open doors, widths of sidewalks, doors and toilets. The "accessible path of travel" approach dictated that each of the following be surveyed at each facility as applicable: parking, curb ramps, pathways, accessible circulation routes, ramps, doors and gates, stairs, building lobbies and corridors, elevators, water closets, lavatories, assembly areas and drinking fountains.

The Transition Plan attached is based on an analysis of what facility changes need to be made to the "A" buildings over three years in order to achieve the goal of program accessibility. The plan will not require nor is it required to bring the buildings up to the ADA Accessibility Guidelines (ADAAG) which will be required for new construction and renovation. The draft plan has been reviewed by the Access Committee for the Mayor's Committee for Employment of Persons with Disabilities and met with general approval except for concerns regarding the old Public Safety Building. The draft plan was amended to reflect these concerns.

Identification of Barriers. Attachment B, titled "ADA Transition Plan" lays out needed corrections in several categories. In general:

- Parking - provision of accessible parking including van accessible parking
- Curb - curb ramps and general ramps
- Signage - denoting accessible and inaccessible entrances, exits and routes
- Pathways - exterior and interior routes that limit accessibility of programs to people with mobility and visual impairments.
- Doors - widening, adjusting pounds per pressure, correcting threshold problems, replacing door hardware
- Restrooms - Corrections range from the few (lowering a dispenser or mirror, changing out lavatory knobs for levers) to the many (where major renovations are required). It also includes accessible port-a-potties in parks where port-a-potties are currently placed.
- Fountains - Cup dispensers are being added to inaccessible fountains.

OFFICIAL RECORD
CITY SECRETARY
FT. WORTH, TX

- Elevators - adding braille and audible signals, plus a few lifts.
- Other - for public assembly areas adding assistive listening devices and wheelchair seating, and in libraries adding accessible computer and catalog tables.

Every "A" building has been analyzed by the above categories for correction. A facility that needs work in that category will be denoted with a 1, 2, or 3. These refer to each of the three years work will take place in, as the ADA requires that all changes be accomplished by January 26, 1995. The list of all structural modifications to be made and their locations may be found in Attachment B.

Schedule for Removing Barriers. You will note that first year work is in parking, curb cuts/ramps, and signage. This is in line with the Department of Justice's first priority to be able to enter a building. Pathways and door corrections enable circulation to where services are offered and are a second priority to be corrected in Year Two. The third priority is for accessible restrooms which will be accomplished in Year Three with certain exceptions. City Hall will have one accessible restroom per floor for each sex in Year One as will the Municipal Courts. Year Two restrooms include libraries and multi-purpose centers.

As required, the Transition Plan outlines changes by ADA year One, Two, and Three since it will take more than one year to accomplish the changes. While the City of Fort Worth Transition Plan is a three year plan, it should be recognized that some changes will occur over time given the great number of facilities involved. Existing facilities change usage and new facilities come into the City's inventory. There is also the possibility of administrative error. Therefore, the City of Fort Worth reserves the right to update and correct the Transition Plan as appropriate.

Installation of Curb Ramps. Another required portion of the Transition Plan is the schedule for provision of curb ramps where pedestrian walks cross intersections.

In order to prepare this plan it was necessary to inventory the existing infrastructure. Using an existing Fire Department database of all 16,000 intersections in the City, a survey instrument was designed which could be used to easily check every corner of each intersection (Sample Attachment C). A two-person team was assembled and trained by Scott Haynes of R.E.A.C.H. Independent Living Center to physically conduct the survey. As of June 14, 1992 the surveyors had completed surveys of 1,275 intersections of approximately 10% of the entire City.

Given the short time frame, the initial emphasis was placed on areas of the City which are most traveled and visited by the general public. Also, priorities were assigned in accordance with

the ADA and staff concentrated efforts on Priority 1 (State, Local, Federal, County government buildings). Areas of the City which have been surveyed include the Central Business District, the Cultural District, the Hospital District, the Stockyards, intersections adjacent to all public schools, Texas Christian University area, Texas Wesleyan area, and the Southwestern Baptist Seminary area. The surveyors will continue to work and it is our plan to complete the entire City.

Staff proposes to have under contract Priority 1 improvements by January 26, 1993. Based upon the sample survey of intersections completed to date we estimate that an expenditure in the range of \$500,000 will be necessary to complete Priority 1.

Priority 2, Access to Transportation such as the "T" bus stops, and Priority 3, Places of Public Accommodation such as retail stores, restaurants, and hotels are to be completed during ADA Year Two by January 26, 1994.

Priority 4 includes Employers and Commercial Facilities. These intersections would be completed in Year 3 by January 26, 1995.

Staff plans to address Priority 5 (Residential) whenever street renovation or reconstruction occurs or upon request. The main thrust of our bond programs are the reconstruction of neighborhood and inner city streets.

Priority 6 ("Other" - parking lots/open fields) needs will also be addressed upon request or if development occurs. The Transportation and Public Works Department has developed the attached "Policy Regarding Installation of Curb Ramps". Upon approval this policy will regulate the installation of curb ramps on all Transportation and Public Works projects.

New curb cuts will feature three (3) narrow parallel grooves to provide detectable warnings to the visually impaired.

Telephones: The Information Systems and Services Department is surveying all public phone locations. Among other requirements, one public telephone per floor must be accessible in terms of height and hearing volume control. All improvements to telephones will be accomplished in ADA Year One.

Financing: One million dollars (\$1,000,000) is being put in an ADA Special Projects Fund to pay for Year One improvements.

Official Responsible for Implementation:

Charles Boswell, Assistant City Manager; Libby Lanzara, ADA Coordinator

Opportunities for Public Input:

As mentioned earlier, the Access Committee, a subcommittee of the Mayor's Committee on Employment of Persons with Disabilities, participated with City staff throughout this project. Project phases included training of staff, representative site visitation and analysis of needs. The names and organizations of committee members is attached as Attachment D.

July 7, 1992 This item was discussed at the City Council work session. A number of members of the Access Committee were present.

The Informal Report and Transition Plan were made available in the Central Library and branches. Alternate formats were made available.

July 8, 1992 A public meeting was held in the City Council Chambers at 6:00 PM to explain the ADA Transition Plan and to take public comment. It was carried on City Cable Channel Mac 5.

July 21, 1992 The Transition Plan will be on the City Council Agenda for action and as such may be commented upon by the public and people with disabilities. It must be adopted at this time as the Federal deadline, by law, is July 26, 1997.

Formats Available. The earlier Informal Report to Council and the Transition Plan are available in print format and on disk. Due to the technological problems of printing columns in Braille, the Transition Plan is unavailable in Braille. However, the Informal Report will be available in Braille. For information regarding disk or Braille formats, please call Libby Lanzara at 871-8552. Printed copies of the Transition Plan and Informal Report are available for inspection in Ms. Lanzara's office and in all Public Library facilities.

CITY BUILDINGS AND FACILITIES SURVEY FOR ACCESS

DOES THIS BUILDING/FACILITY HAVE THE FOLLOWING MINIMUM REQUIREMENTS TO MEET HANDICAPPED ACCESSIBILITY REGULATIONS?

ITEM

1. PARKING - parking diagram - Figures 9 & A5	YES	NO	N/A
a. Are the required number of parking spaces provided (see Chart 1)?			
b. Is one space van accessible?			
c. Are the spaces on level (less than or equal to 1:50 or 2% slope? (CURB RAMP MUST NOT PROJECT INTO ACCESS AISLE)			
d. Are the spaces at the closest (required) level point to the building's accessible entrance?			
e. Is there 1 van space (96" plus 96" aisle) for every 8 accessible spaces? (overhead clearance of 98")			
f. Are universal symbol of accessibility signs posted?			
g. Is the parking surface stable, firm, and slip resistant?			
COMMENTS			

2. PASSENGER LOADING ZONES - see Figure 10	YES	NO	N/A
a. Is there a passenger loading zone?			
b. Is there a passenger loading zone which is posted?			
c. Is the zone 20' length and an access aisle of 60"?			
COMMENTS

4. PATHWAYS - Figures 1 and 8(a)	YES	NO	N/A
a. Is there at least 80" clear headroom along the path? (or a cane detectable barrier within 27" of the ground?)			
b. Are protruding objects 4" or less? (or with bottoms below 27"?)			
c. Do grates have openings of less than 1/2"?			
d. Are transitions from curb ramps to walkways, streets and gutters flush and free of abrupt changes?			
e. Is there a minimum of 48" clear space within the crosswalk lines at the bottom of a diagonal curb ramp?			
f. Are there any cross slopes of over 1:50 (2%)?			
g. Are signs clearly posted indicating accessible route to entry?			
h. Are all inaccessible entries posted with a sign directing wheelchair users to an accessible entrance.			
COMMENT			

5. ACCESSIBLE CIRCULATION ROUTE (Fig. 7 & Fig. 2)	YES	NO	N/A
a. A continuous unobstructed path of travel that connects all accessible elements and spaces in a building or facility.			
b. Sidewalk clear width of 36 inches (44 to 60 inches preferred).			
c. Hall and corridor clear width of 36 inches if less than 30 feet long, 44 inches if greater than 30 feet long. Room pathways generally 32 inches clear width.			
d. A 60 inch by 60 inch passing space at reasonable intervals (200').			
e. Level, smooth, firm, stable non-slip surface.

Additional Comments:

6. RAMPS - See Figs. 17, 15, 12, 13 & 16	YES	NO	N/A
a. Each inch of rise requires one foot of run (e.g., a 6 inch step requires a 6-foot long ramp.)			
b. Clear width of 36 inches if less than 30 feet long, 48 inches if over 30 feet long.			
c. Handrails on both sides (if ramp is longer than 6 feet) mounted at 30 to 36 inches above ramp surface with returned ends extending parallel 12 inches at top and bottom landings.			
d. Are landings and top and bottom approaches level and at least 60" long and as wide as the ramp?			
e. If the ramp is more than 6' long is there a handrail?			
COMMENTS:			

Fig. 17
Examples of Edge Protection and Handrail Extensions

7. DOORS AND GATES - Fig. 25 and Fig. 26	YES	NO	N/A
a. Clear width of at least 32 inches.			
b. Level change at doorway thresholds not to exceed .5 inch beveled (ramped if > .5).			
c. Door handles easy to grasp and easy to open or close (lever or U-shaped handles preferred).			
d. Interior hinged doors maximum 5 lb. exterior (Regulation reserved) between 5-12 lb preferred.			
e. Do all gates including ticket gates meet the same standards for doors or provide an accessible entry?			

NOTE: x = 12 in (305 mm) if door has both a closer and latch.

(a)
Front Approaches - Swinging Doors

NOTE: y = 48 in (1220 mm) minimum if door has both a latch and closer.

(b)

12. LAVATORIES	YES	NO	N/A
a. Under sink clearance from floor to bottom edge of 29 inches.			
b. Insulated or covered hot water and drain pipe under sink. No sharp protrusions.			
c. Reach not to exceed 20 inches front or 24 inches side approach.			
d. Lever faucet handles preferred.			
e. Clear floor maneuvering space in front of lavatory 30 x 48.			
f. Operating components of dispensers mounted at 48 inches for front or 54 inches for side approach.			
g. 40 inches maximum height from floor to bottom of mirror, or tilted mirror available.			
COMMENTS			
13. ASSEMBLY AREAS/CONFERENCE ROOMS/AUDITORIUMS	YES	NO	N/A
a. Level seating areas 33 to 44 inches wide by 48 inches long for frontal approach (or 60 inches long for side approach).			
b. Clear sight line.			
c. If over 300 seats, is wheelchair seating integrated and offered in more than one location.			
COMMENTS			
14. DRINKING FOUNTAINS	YES	NO	N/A
a. 36 inch maximum height from floor to water spout opening.			
b. Easy to operate with push-bar or lever handle preferred with parallel spout at front/water flow 4" high.			
c. Clear floor space in front of the drinking fountain (30 x 48).			
COMMENTS			
15. OTHER	YES	NO	N/A
a. Does the facility have a TDD?			
b. Is the emergency warning system both audible and visual?			
COMMENTS

SAMPLE STREET SURVEY FORM

POLICY REGARDING INSTALLATION OF CURB RAMPS

It will be the policy of the Transportation and Public Works Department regarding the installation of curb ramps that:

- * In existing developed areas whenever a street is reconstructed curb ramps will be installed where there are existing sidewalks or where new sidewalks are planned.
- * In newly developing areas if sidewalks are planned a curb ramp must be installed at each corner adjacent to the sidewalk so that a clear path of travel is provided.
- * Curb ramps will be installed upon request from citizens if there is an existing paved sidewalk or a new sidewalk planned.
- * If there is no existing paved sidewalk or no new sidewalk planned, ramps will only be installed if there is a demonstrated need that will be addressed by the construction of the ramp.

Curb ramps will be installed to the maximum extent possible so that a clear path of travel is provided. This path of travel, including the curb ramp, should be free of all obstructions or barriers to accessibility. This would include such obstructions as signs, signal light poles, fire plugs, trees, etc.

OFFICIAL RECORDS
CITY OF FORT WORTH
F. W. MURPHY, TX

City of Fort Worth, Texas

Mayor and Council Communication

DATE	07/21/92	REFERENCE NUMBER	G-9742	LOG NAME	13ACT	PAGE	1 of 1
SUBJECT	TRANSFER OF FUNDS FROM CAPITAL PROJECTS RESERVE FUND FOR COMPLIANCE WITH THE AMERICANS WITH DISABILITY ACT (ADA)						

RECOMMENDATION:

It is recommended that the City Council approve the transfer of \$1,000,000.00 from the Capital Projects Reserve Fund to the Specially Funded Capital Projects Fund to pay for expenses associated with the implementation of the City of Fort Worth's ADA transition plan.

DISCUSSION:

The Americans with Disability Act (ADA) requires the development of a transition plan to make public buildings and facilities accessible to the disabled population. The plan has been developed and must be adopted by the City Council by July 26, 1992. Implementation of the plan is to take place over a three year period.

One million dollars is estimated to be required for the first year's expenses associated with implementation of the City's plan. Almost half of the \$1,000,000.00 is required for curb cuts and ramps for entrance to governmental facilities. Improvements will be made at approximately 245 facility locations in the first year. One hundred and forty-five of the locations will require provision of handicapped parking areas and appropriate signage. Corrections are also required in restrooms, elevators, and special use areas.

FISCAL INFORMATION/CERTIFICATION:

Funding for the Capital Projects Reserve Fund is provided annually primarily through payment from the sale of Greater Southwest International Airport, reimbursement for the land given for DFW Airport, and from time to time when the City sells a capital asset. The balance in the Capital Projects Reserve Fund after this transfer will be \$1,151,909.00.

The Director of Fiscal Services certifies that upon the approval of the fund transfer, money required for this expenditure will be available in the current budget of the Specially Funded Capital Projects Fund.
