

The Holidays are right around the corner! Fats, oil, and grease can cause blockages in your arteries, and they can do the same to sewer pipes. Grease comes from meat, margarine, shortening, cooking oils, lard, and many other common foods.

- ***Never pour oil or grease down the sink or any household drain.***
- ***Never pour oil or grease down a storm drain.***

Take all used solid and liquid cooking oil to the free Environmental Collection Center. For location, hours, and more info about the center call 817-392-1234.

**Call Us
First!**

**If you have a sewer back up in your home, call
Fort Worth Water before calling a plumber!**
