Residential Accessory Buildings

Accessory building non-habitable: A subordinate building on the same premises with a principal building for exclusive use for accessory uses as defined in "Accessory Uses," including, but not limited to, private workshops and storage sheds located on residential lots. ***Section 9-101 Definitions on the Zoning Ordinance.***

General Provisions

Accessory structures are not permitted in front yards ***5.300.B of the Zoning Ordinance***

Non-habitable accessory buildings or structures shall be limited to one story, but may have an attic or loft, provided the attic or loft does not contain heated or air conditioned floor space.

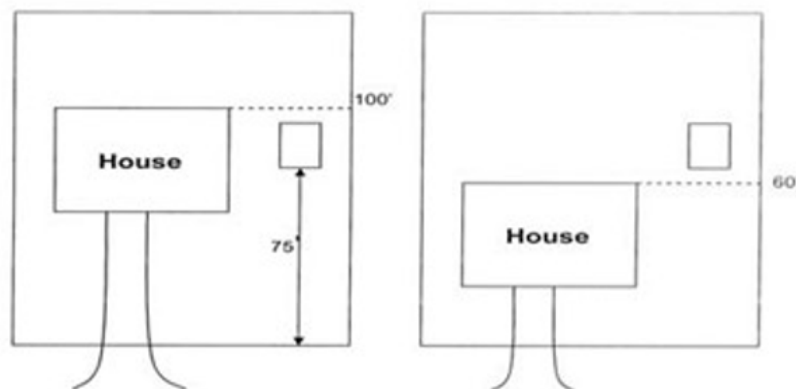

Lot coverage maximum is 50%.

Lot Size	Maximum allowable sq ft for accessory building
≤ 5,000 sq ft	120 sq ft
5,001 - 9,999	200 sq ft
10,000 - 21,779	400 sq ft
21,780 - 43,559	400 sq ft
43,560 and up	2 % of the total area of the lot

All non-habitable accessory buildings, except private garages, private carports, and private portes cocheres, must be located behind the rear wall of the primary residential structure that is furthest from the street or at least 75 feet from the front property line, whichever is the least restrictive ***5.301.B.3 of the Zoning Ordinance.***

Diagram A

The accessory structure must be ≥ 75 feet from the front property line (left) or behind the rear wall line (right) of the primary residential structure that is furthest from the street – whichever is the least restrictive and cannot be in any easement(s). 5.301 B.3.

The height of accessory buildings shall be measured from the ground to the highest point of the building **5.301.B.4 of the Zoning Ordinance**.

Setback requirements:

The distance required from the property line.

Height	Maximum allowable distance from property lines
Up to 10'	5' from rear and side yard
11'	7' from rear and side yard
12' (maximum height without a variance)	9' from rear and side yard

Corner lots have varying setbacks. Refer to Chapter 4 in the Zoning Ordinance for district regulations on individual zoning.

Accessory buildings must be anchored or placed on a foundation that meets City of Fort Worth minimum standards and require skirting of the structural elements do not come in contact with the ground.

Exception:

The resident has the option of applying for a variance from the Board of Adjustments for any Zoning requirements if they cannot comply 3.300 & 3.400 Zoning Ordinance.

Application must be made in person with the Planning and Development Applications Division.

A permit must be applied for in person and approved before construction begins. Failure to do so could result in your permit(s) being assessed a double fee in accordance to the 2015 International Building Code.

Standard Permit Submittal Requirements:

(Please note that depending on your location and scope, additional documents may be required.)

1. Completed building permit application
2. Two (2) copies of a site plan showing the location of proposed structure(s) and all existing structures on the lot
3. Two (2) copies of the floorplan
4. Two (2) copies of the legally recorded plat to accompany any hand-drawn construction plans
5. ****If encroaching on any utility easements:*** Two (2) copies of statements from each utility company on their letterhead stating that they approve the specific encroachment. Contact Customer Service at 817-392-2222 for a list of companies.

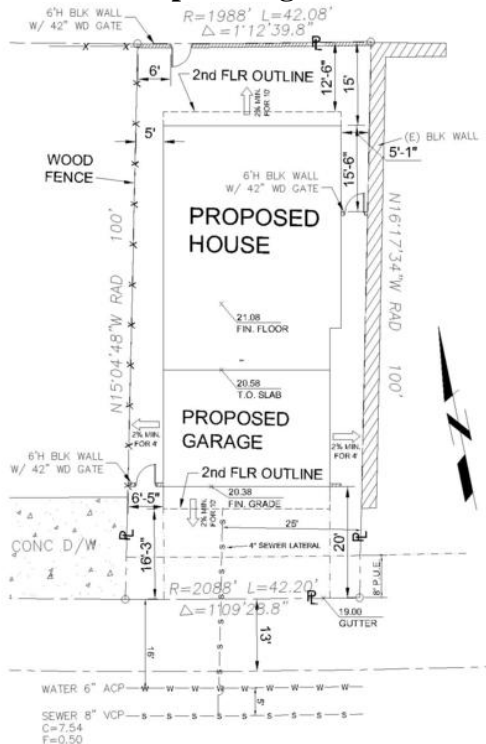

Plan Examples

Construction Documents. Information on construction documents shall be dimensioned and drawn upon suitable material. Construction documents shall be of sufficient clarity to indicate the location, nature and extent of the work proposed and show in detail that it will conform to the provisions of this code and relevant laws, ordinances, rules and regulations, as determined by the building official. (Ref: Section 107.2.1 of 2015 IBC)

Site Plan. (Outside the building) A site plan depicts the location of the building on the lot, the size of the lot, the distance from the property lines to the building and the outline of the building. (Ref: Unit 1 of Basic Code Enforcement – Pg. 142) See diagram A.

Floor Plan. (Inside the building) A floor plan shows the layout and dimensions of the rooms in the proposed construction. Type and thickness of wall partitions can also be determined. Additionally, the location of sinks, toilets, bathtubs and appliances is shown. (Ref: Unit 1 of Basic Code Enforcement – Page 142) Floorplans will also provide the location of rooms labeled as to their use, doors, windows as well as mechanical and electrical fixtures. See Diagram B.
